

PE Pipe Pullers

Footage Tools' Pipe Pullers have been engineered to pull medium to high density PE pipe. Manufactured from solid stress proof material, all pipe pullers feature sharp tapered buttress style threads making insertion of the puller quick and simple. Pullers screw directly into the end of the pipe. Each puller features a heavy duty swivel which enables the pipe to rotate freely during the pulling operation.

A unique double start buttress style thread permits quick insertion of 1-1/4" and larger pullers into the pipe when compared to conventional single start threads. The sharp edges of the threads have been left intact to allow for smoother installation and a tighter grip on the pipe. As the pipe or tube is pulled, the sharp edges of the tool seat into the pipe ensuring the tool establishes a stable hold.

Pipe Size	Part Number	Pipe Size	Part Number
1/2" CTS	P020	1" IPS	P045
3/4" IPS	P035	1-1/4"	P055
1" CTS	P040	2"	P085
